

Need training?

We prepare employees for technical excellence.

From 5 hours to 5 days, we provide training to utilize technology products to their fullest potential. Based on our extensive experience working with optimization & analytic tools, we have designed learning paths for FICO Xpress Suite.

Our approach emphasizes the most important elements you will actually use on a daily basis, with videos created by our award-winning, certified consultants who have real-world experience. Whether you are new to these products or need a refresher, Cresco is here to help!

What We Offer

In-person training

Computer-based training

Product certification
(>96% pass rate)

With Product From FICO

FICO

- Overview of Xpress Optimization Suite and Mosel,
- Mathematical Programming Basics,
- Xpress Mosel Language Features,
- Modeling problems with Xpress Python Interface,
- Recognizing and Handling Infeasibility,
- Deploying Optimization Models Using Xpress Insight

Cresco is a dynamic company that provides technology and consulting services focused on business analytics. We take on challenges using small, specialized teams with high-value outcomes and superior success rates.

As trusted advisors with technical knowledge and business acumen, we integrate the latest technology with our line of award-winning, customized solutions to help build success into organizations on a global level and across a wide spectrum of industries.

Need help?

We provide premium staff solutions.

Too much to do and too little time? Instead of paying the high costs of bringing onboard a new employee, why not temporarily hire an experienced Cresco team member to work for your organization?

They will be able to assist with any technological needs your organization requires for a set fee, which is lower than the total cost of hiring a full-time employee. Let one of our certified team members help your business accomplish its goals.

Retain knowledge

No onboarding,
no turnover

conversion

Benefits of Staff Augmentation

Specialist Expertise

Choose amongst our team of specialists of data analytics, engineers, and scientists to fill in the gaps at your organization.

Meet Deadlines

Staff augmentation is much faster than the traditional hiring and onboarding process for a full-time employee.

Reduced Hiring Cost

Avoid the high cost of hiring a full-time employee or investing in internal skill development.
